- 123 Anywhere St., Any City
- www.reallygreatsite.com

## PROFILE SUMMARY

A DevOps engineer with experience in automating the development, testing, and deployment pipelines. Focused on optimizing system performance, improving uptime, and ensuring smooth deployment processes using various cloud and automation tools.

## EDUCATION

- B.Tech in Information Technology, XYZ University, 2019
- Certification in Ethical Hacking, ABC UNiversity, 2020

## SKILLS

- CI/CD Tools: Jenkins, GitLab, CircleCI
- Cloud Platforms: AWS, Azure, Google Cloud
- Scripting: Python, Bash, PowerShell
- Containerization: Docker, Kubernetes
- Infrastructure as Code: Terraform, Ansible
- Version Control: Git, GitHub

## WORK EXPERIENCE

DevOps Engineer, CloudTech Systems, 2022–Present

- Automated deployment pipelines using Jenkins and Kubernetes, reducing deployment times by 40%.
- Managed cloud infrastructure on AWS and ensured high availability and scalability.
- Developed infrastructure as code using Terraform to streamline environment provisioning.

## CERTIFICATIONS:

- AWS Certified DevOps Engineer – Professional
- Docker Certified Associate
- Certified Kubernetes Administrator (CKA)

## PROJECTS:

- CI/CD Pipeline Implementation: Designed and implemented a full CI/CD pipeline to automate code integration and delivery processes.
- Infrastructure Automation: Automated cloud infrastructure provisioning using Terraform, reducing setup time for new environments.

## EXTRAS:

- Contributor to DevOps-related open-source projects.
- Strong focus on automation and improving efficiency.
